Dear Hai,

170kg in stock already booked, furthermore, confirmed PO over 1.5mt. Scheduled production is 300kg in June, 900kg in July, no in Aug, 900kg in Sept. meanwhile, please note this plan is adjustable based on firm PO.

This year, tin process, tin free process, non-regulated material, all grades of valsartan in short supply. But as you know, we're building new valsartan workshop (80mt capacity), long term supply of Valsartan should not be a problem.

I think usually standard lead time 90 days should be okay, as they might not in urgent need now. if they have specific demand on qty and had their preferred deliver time, please just let me know and I can have it discussed internally.

Attached is typical C/A of USDMF standard Valsartan, tin-free process.

Best,
Jessica

Dear Hai,

I think for them we need tin-free process. Currently we have 170kg in stock, I am not quite sure whether it is already booked, as you know Valsartan is already in short this year. I will further check tomorrow and let you know production schedule as well. Together with C/A.

Best,
Jessica

Importance: High

Dear Mr. Chen,

Could you please indicate the pricing for Valsartan? The customer is Forest Lab.

Jessica, can you update me with inventory status? Also provide a copy of typical COA.

Thanks,

Hai Wang

Hai,

Forest needs 2-300 Kgs of Valsartan for development purposes. Can we get spec, c of a, lead time, and pricing for the 2-300 Kgs and then 1,5, and 10 MT indications?

Thanks

Malcolm

Charles,

They have inventory in stock. What are Forest's short term needs? Would you like to get a specification, C of A and pricing?

If so, what volumes are you considering?

Thanks

Malcolm

Malcolm

No word on Lexapro from business development. Sam filled me in on your added Chinese duties.

I will be contacting Huahai on another product (Valsartan) that I need immediate delivery.

Hi Charles,

I just got back from two weeks in China and got to visit the production facility that makes a majority of the world's advanced intermediate for Lexapro. I'm guessing the first couple of steps of this API are pretty cost effective based upon what I saw.

Any news from your side as to what your direction will be with Huahai?

Thanks and Best Regards,

Malcolm
